

# Automation

## Remote Monitoring and Control (M&C) systems

QPS can **design, build, install** and **service** custom systems to automate tasks in the field, saving customers time and money. Our PCS, PLC, safety, monitoring, master-control and work-specific automation systems are operating successfully across the U.S. and world. Our team will bring decades of combined experience to your project, ensuring systems meet your specific needs.

We provide software and hardware solutions for your facility's process and safety control systems with remote monitoring.

- Electrical control panels
- Filling and loading stations
- Motor control systems (MCS)
- Chemical injection skids
- LACT and gas metering skids
- Utility and solar power systems
- Automated reporting solutions
- Safety Integrated Systems (SIL 2/3)
- RF and mesh communication systems
- Distributed control systems (DCS)
- Flow computers
- Programmable logic controllers (PLC)
- Complete SCADA systems
- Process control systems (PCS)
- Production and wellhead control
- Pipeline monitoring and control
- Compressor stations
- Human-machine interfaces (HMI) design and configuration
- Systems architecture
- Automated artificial lift solutions

### SOFTWARE:

- FactoryTalk View SE and ME
- Wonderware
- Studio Logix
- RSLogix 5000 and 500
- TIA Portal
- Proficy
- STEP 7
