

# Pigging Products

## QPS is a full service pipeline solutions provider.

Our goal is to provide quality pipeline cleaning and maintenance services and exceed your expectations.

### PIPELINE PIGGING

QPS keeps an extensive inventory of pigging products in stock that can be shipped to your job location quickly. Custom pigs can be expedited in order to meet your deadline.

### SERVICES

When you contact QPS, you will speak with an industry expert who will answer questions and provide solutions immediately. Our representatives are available 24/7.

### CONSULTING

With more than 40 years experience in the pipeline service industry, our consultants can design a custom pigging program specifically for your pipeline.

### CHEMICALS

Through our manufacturer who has their own in-house chemical company QPS can provide all the chemicals for your next project.

## FOAM PIGS

We offer a variety of light, medium and heavy density foam pigs for any application. These pigs can be bare foam, poly crisscross or wrapped in wire brush with bullet nose or bi-directional. The pigs can be extended in length and can be equipped with a transmitter cavity and pulling rope if needed. Whether you need swabs for drying or brush pigs for cleaning, QPS has the right pigs for the job.

## SOLID URETHANE PIGS

Great for routine pigging and product displacement, we offer a variety of solid urethane pigs with a variety of cups and disc configurations. These pigs come in a range of durometers from soft 60A to harder 90A if needed. They can also be outfitted with wire brushes for more aggressive cleaning and transmitter cavity.

## STEEL MANDREL PIGS

These of style pigs are ideal for chemical cleaning, black powder removal, paraffin removal, or simply gauging a pipeline. Starting with a steel body, our mandrel pigs can be configured in a variety of combinations. They can be outfitted with polyurethane or rubber cups and/or disc aluminum gauge plates, wire brushes, magnets and transmitter cavities.

## PIGGING ACCESSORIES

QPS offers a variety of pigging related tools to assist with your next pigging project. Some of these items include pig tracking equipment, pigging/cleaning chemicals, pig retrieval poles, replacement closure O-rings, pigging valves, product containment berms, dewatering fitter bags, dust suppression bags, and frac tank ventilation bags.
