

# Valves and Actuators

QPS is VR certified for field repairs and testing on air, gas and liquids PSVs.

QPS sells and services all valve types: **wellhead, choke, header, check, control, dump, gate, ball and plug**, along with **three- and four-way divert valves**.

We offer the same services on actuators and actuated valves, including piston, diaphragm and rotary.

QPS can repair valves and actuators for process-control applications as well as pressure and level controllers.

We have the resources to engineer and design your control valve applications and can solve your process problems with suggested trim changes, special designs and controller or process modifications.

## Repairs, Testing and Installation

QPS also provides manufacturer-trained technicians for installing, trouble shooting, and performing maintenance on **Limitorque**®, **EIM**®, and **Rotork**® electric actuators.

## Replacement Parts Repairs, Testing and Installation

We stock a wide assortment of replacement parts and repair kits for relief valves. We sell new and reconditioned relief valves and offer testing and repair, along with certified fluid test reports.
