

Instrumentation & Electrical

TURNKEY I & E SOLUTIONS

Design, Build, Install and Service

For new construction, facility upgrades and expansion projects of any size, QPS is your single-source provider for all electrical systems. From concept to commissioning to facility maintenance, we offer engineering, drafting, programming, fabrication, installation, testing, calibration, commission and troubleshooting.

Remote Monitoring

QPS will design, build, test and install SCADA (Supervisory Control and Data Acquisition) systems to suit your specific needs. We'll provide the computer hub or other HMI where you need it, along with all of the equipment and technology linking it to oil and gas facilities on land or offshore.

Quality is Where it All Begins

- **Maintenance, troubleshooting and repairs**
- **Start-up and commissioning**
- **Power generation & control panels**
- **Production and process safety systems and controls**
- **Electrical distribution & motor control centers (MCC)**
- **Metering stations**
- **Compressor stations**
- **Valve sites**
- **Tank storage facilities**
- **Completions & fluids plants**
- **Pump stations**
- **Chemical plants**
- **Refineries**

We also offers service, sales, testing and repair for pneumatic, hydraulic, PLC, SCADA and Electrical Systems.

Custom fabricated panels and housings are made to your job site's specifications
